

What I've Learned

This is a way to have students relate new knowledge to real world issues.

Teacher Preparation:

1. Determine a focus topic.
2. Make a copy of the handout (4-2-2) for each student.

Lesson Plan:

1. Have students fill in the worksheet relating the focus topic to the five categories.
2. Students do not need to respond in every category but should have a total of six statements distributed in any way they wish among the five categories.
3. Optional: Have students select one statement and extend it by illustrating it, creating a song about it, writing a poem or skit, or carrying out another creative task.
4. Follow up with small or large group discussion.

What I've Learned

Here are some life lessons related to _____.

...about family

...about friends

...about school

...about myself

...about our world
